FPD HD SERIES Mobile C-Arm Unit

FPD HD SERIES is a mobile C-Arm IMAGE INTENSIFIER system specially designed for Orthopedics Urology, Gastroenterology, Abdominal and other surgical procedures with superior image quality on single / double screen high resolution monitor.

Large FOV
It has an active region of 23.6 cm x 23.6 cm (9.3 x 9.3 in), a large field of view that dramatically increase imaging area capacity.

Versatile Design
Compact, slender panels provide more free space for C-Arm modalities. Light weight and convenient for diverse applications.

TIALIC
More efficient workflow with Time-Independent-Adaptive Low-Dose Image Correction technology. Avoid low signal-to-noise ratios caused by insufficient high voltage power.

Advance Technology
Direct-Deposit Csl combined with a precise balance of engineering factors. Panels developed for highly detailed, low-dose diagnostic imaging.
